

Estimator – Maidenhead, Berkshire

We are a leading provider of large power systems for the critical power supply market within the UK. Based in Maidenhead we serve London and the South of England with all of the major diesel generator and critical power solutions. We have a diverse client base ranging from Data Centres, Financial Institutions, Retail, Public Sectors and the Utility markets, due to continued growth in these areas we have a new opportunity for an Internal Estimator to work closely with our external Sales Executives producing detailed quality tenders for major projects. We would envisage that the successful candidate would have the following:

Extensive experience in estimating large M&E Contracts

Have worked successfully within a major contracting organisation

Have a good understanding of mechanical and electrical products (previous experience with diesel generators would be a distinct advantage)

Ability to enhance and build on existing Supply Chain

To produce quality tender documentation and supporting cost information.

To be confident and able to support Sales Engineers at external tender meetings.

Job Type: Permanent

Required education:

- High school or equivalent

Required experience:

- Mechanical and Electrical: 2 years

Required licence or certification:

- Driving License
