HIRE UPS SYSTEMS - 500kVA CONTAINERISED

Disaster Recovery? Project Overrun? Major System Modification?

AVK SEG (UK) LTD can provide the “Back-up Power Solutions for your Critical Power Needs.”

The continuous operation of computers, process, and telecommunication equipment is the lifeblood of many companies and should an unplanned event occur causing long-term power disruption or damage to the equipment room, then serious financial implications could result.

Whether you have a Major System Modification, Project Overrun or a Disaster Recovery situation, AVK SEG (UK) LTD can provide a Containerised UPS System mounted on a transportable trailer for such an event, on short or long term hire, with a rapid response. The Containerised Hire UPS comes complete with its own battery and output distribution switchboard.

If you are undergoing a Major System Modification you will need a High Integrity UPS System which gives you that Critical Power Support in a hurry!
